WORMING ADVICE QUESTIONNAIRE

Client name:

Horse:

For an easy, economic and effective worming plan, we would recommend you use the Hook Norton Worming Pack which contains veterinary advice, detailed guidelines on how to worm your horse according to its individual history and signalment, free worm egg counts and a year's supply of wormers.

When did you last worm your horse?

What product did you use last?

How heavy do you estimate your horse to be?

How old is your horse?

Could it be a foal?

Is the horse in good health?

Is it prone to colic?

We would advise that you use product, and in weeks time use

We recommend that you check the efficiency of the anthelmintic by bringing us a fresh faecal sample 7-10 days after worming. Treat all the horses on the yard with the same product at the same time. Keep all animals stabled or off pasture for twenty four hours after administration.

Please use the chart for further guidance. Contact the surgery on 01608 730085 if you need more advice.
